OBJECTIVE

Passionate and self-driven cyber security enthusiast with a solid foundation in programming, networking, and system security. Seeking opportunities to apply technical skills in real-world security environments, contribute to secure system development, and grow as an ethical hacker.

EDUCATION

B.Tech in Electronics and Communication Engineering, MAKAUT University Expected 2027

Relevant Coursework: Data Structures and Algorithms, Computer Networks, Cyber Security Fundamentals, Network Security, Cryptography, Microprocessors, Embedded Systems

SKILLS

Programming Languages	C/C++, Java, Python, Bash
Web Development	MERN Stack, REST APIs, SQL
Version Control	Git, GitHub
Operating Systems	Linux (Kali, Ubuntu), Windows
Cyber Security	Ethical Hacking, Wireshark, Nmap, Burp Suite, Metasploit, Aircrack-ng
Embedded Systems	Arduino

EXPERIENCE

Self-Led Cyber Security Trainee Jan 2025 – Present

- Completed labs (TryHackMe, HackTheBox) on networking, Linux, and web security.
- Used Nmap, Wireshark, and Burp Suite for scanning and packet analysis.

CERTIFICATES

- Cyber Security & Networking Labs — TryHackMe, HackTheBox, Linux Administration & Networking
- Arduino & Embedded Systems Programming
- [Ethical Hacking by Edureka](#)
- [Ham Radio Certification](#)
- [VLSI Certification](#)

PROJECTS

- **Port Scanner:** Multi-threaded Python tool for detecting open ports and running services.
- **Smart Speed-Based Alarm System:** Real-time vehicle overspeed alert system using sensors and microcontrollers.

EXTRA-CURRICULAR ACTIVITIES

- Tech Blogger / Content Contributor — Shared cyber security insights and tutorials online.
- Hackathon Participant — Competed in national and inter-college hackathons.

LEADERSHIP

- Led project teams during academic and club-level activities, ensuring timely execution and success.
- Recognized for strong communication, strategic thinking, and decision-making in technical and academic settings.
